DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

Research findings

Country code	Year	Reference details title	Reference details URL	Main thematic focus	Institution	Key findings - Short summary	Methodology (Qualitative/Quantitative and exact type used, questionnaires etc)	Sample details and representativeness	Area/location of interest - NUTS3 level
Slovenia	2023	Slovenia, Zagovornik načela enakosti (Advocate of the Principle of Equality) (2023), Ključni rezultati javnomnenjske raziskave 'Raziskava o diskriminaciji 2022': raziskovalno poročilo (Key results of the survey 'Research on discrimination 2022': resear	https://zagovornik.si/wp-content/uploads/2023/09/Raziskovalno-porocilo-2022.pdf	Discrimination, Public perceptions and attitudes	Slovenia, Advocate of the Principle of Equality (Zagovornik načela enakosti)	The Advocate of the Principle of Equality, national equality body, commissioned a survey on discrimination in Slovenia in 2022. The survey measured perceptions and experiences of discrimination among general population in Slovenia. Amongst others, the survey findings show that 49 % strongly agreed or agreed that it was not right for an employer to refuse to hire a woman just because she wears a headscarf. According to 26 % of respondents, foreigners and poor people are most often target of discrimination, followed by women (23 % of respondents), same-sex persons (22 %), religious people (14 %), persons with different disabilities (13 %), Roma (9 %), migrants and dark-skinned people (8 %, respectively) ... refugees (6 %) ... Muslims (2 %). Among respondents who claimed that they were subject to discrimination in 12 months before the survey, 24 % stated that their social position was the reason, followed by education (18 %), health status (17 %), religion or beliefs (16 %), political beliefs (15 %) ... ethnic origin or race (8 %) ... nationality (4 %). The survey also showed that 75 % of the respondents were not aware of the existence of the Advocate of the Principle of Equality.	Quantitative - survey (CATI and CAWI). The survey took place in September 2022.	Sampling frame - residents of Slovenia aged between 18 and 75 years. Number of respondents - 1,006 (51 % men and 49 % women), representative sample by gender, age, region and education.	Not applicable - national level
