

# EU LGBTI survey II

## A long way to go for LGBTI equality

### Country data – Romania

#### Survey in a nutshell

- The online survey draws on 140,000 responses from across 30 countries – the then 28 EU Member States (including the United Kingdom), Serbia and North Macedonia.
- The results from the survey present the largest international LGBTI survey of its kind.
- In-depth detailed results for Romania and other countries can be found in FRA's [online data visualisation tool](#).
- See our [methodology Q&A](#) for more about how FRA did the survey. Results based on a small number of responses are statistically less reliable. Thus, results based on 20 to 49 unweighted observations in a group total or based on cells with fewer than 20 unweighted observations are noted in parentheses. Results based on fewer than 20 unweighted observations in a group total are not published.
