

Video conferences with FRA

Video conferencing provides a cost effective and environmentally-friendly solution for anyone who wants to hold meetings with delegates based in remote locations. It reduces the need for expensive travel and excess time out of the office.

FRA supports several technologies for video conferencing.

You can establish a video conference connection with [Microsoft Lync](#) using a computer and a web camera.

If you do not have Microsoft Lync installed, the meeting organiser at FRA will send you a link for downloading and installing Lync, as well as instructions on how to use it.

Lync supports

- Multiparty video conferencing
- Point to Multipoint
- Individual use
- Sharing presentations

You can also organise remote meetings or presentations and connect with FRA meeting rooms, equipped with advanced Videoconference Systems, supporting:

- Multi point access
- Broadcast over IP
- Flexible room configuration
- Presentation Sharing
- Large groups participation

Technical contact points for the video conferencing systems is: [IT HELPDESK](#) or phone 0043 1 58030777.
