DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

Research findings

Country code	Year	Reference details title	Reference details URL	Main thematic focus	Institution	Key findings - Short summary	Methodology (Qualitative/Quantitative and exact type used, questionnaires etc)	Sample details and representativeness	Area/location of interest - NUTS3 level
Finland	2019	Akhlaq, A. (2019), 'Kokeellinen tutkimus etniseen alkuperään perustuvasta syrjinnästä suomalaisilla työmarkkinoilla' (An experimental study into discrimination based on ethnic origin at the Finnish labour market) in Kazi, V., Alitolppa-Niitamo, A., Kaih	http://urn.fi/URN:ISBN:978-952-327-487-7	Discrimination	Finland, Ministry of Economic Affairs and Employment, Työ- ja elinkeinoministeriö	The study show that persons with migrant background receive clearly less frequently invitations for job interviews than persons with Finnish background. The net discrimination rate calculated based on a comparison between Finnish job applicants and four migrant groups, show that the rate is highest for persons with Iraqi (62 %) and Somali (72 %) background. The rate for the other groups were 28 % (English) and 38 % (Russian).	Correspondence field experiment	Five fictitious job applicatons were submitted for 1000 vacancies. The main differene between the five applications were the names and mother tounge of the applicants. The mother tounges were Finnish, English, Iraqi, Russian and Somali.	Not applicable - national level
