DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

Research findings

Country code	Year	Reference details title	Reference details URL	Main thematic focus	Institution	Key findings - Short summary	Methodology (Qualitative/Quantitative and exact type used, questionnaires etc)	Sample details and representativeness	Area/location of interest - NUTS3 level
Lithuania	2019	Liutauras Labanauskas (2019): Qualitative Research on the Communities Vulnerable to Hate Crime (Neapykantos nusikaltimų pažeidžiamų bendruomenių kokybinio tyrimo ataskaita)	https://vrm.lrv.lt/uploads/vrm/documents/files/LT_versija/Viesasis_saugumas/Pa%...	Hate crime, Hate speech: Public incitement to hatred or violence	Lithuania, Ministry of the Interior of the Republic of Lithuania | Lietuvos vidaus reikalų ministerija	The study assessed the level of vulnerability, the impact of hate crimes and hate speech, the reasons for not seeking justice, and the needs for protection of five communities in Lithuania: the Jewish and Roma communities, LGBTI, persons of other race and Muslims. It found out that the representatives of the latter group experience alienation, negative attitudes and stereotypes every day. Theinterviewed respondents talked about bullying, armed threats, street fights and physical injuries. The study shows the lack of appropriate measures to encourage reporting the incidences which contributes to the "normalization" of hate incidents. As a result victims themselves underestimate and mitigate the experienced violations.	Study - qualitative research	Study's findings are based on 35 qualitative interviews and 6 group discussions where 49 people participated.	Not applicable - national level
