DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

Research findings

Country code	Year	Reference details title	Reference details URL	Main thematic focus	Institution	Key findings - Short summary	Methodology (Qualitative/Quantitative and exact type used, questionnaires etc)	Sample details and representativeness	Area/location of interest - NUTS3 level
Netherlands	2022	Dagevos, J., De Voogd-Hamelink, M. and Damen, R. (2022). Established in the Netherlands, but it's not home. Initial findings of the Survey on Migrant Integration (sim2020). The Hague. The Netherlands Institute for Social Research (SCP)	https://www.scp.nl/binaries/scp/documenten/publicaties/2022/10/11/gevestigd-maa...	Discrimination	The Netherlands, Netherlands Institute for Social Research (SCP)	The report contains figures on perceived discrimination (answer to the question about whether respondents have experienced discrimination) by origin or migrant group, gender and generation. The figures for origin groups with a muslim background are: --people with a Turkish background: 12 % for the whole group, 10 % for females, 14 % for males, 9 % for 1st generation, 16 % for 2nd generation - people with a Moroccan background: 12 % for the whole group, 17 % for females, 11% for males, 9% for 1st generation, 16 % for 2nd generation - people with an Iranian background: 8 % for the whole group, 7 % for females, 8 % for males, 7 % for 1st generation, 9 % for 2nd generation - people with a Somali background: 11 % for the whole group, 10 % for females, 11 % for males, 8 % for 1st generation, 24 % for 2nd generation	The report is based on findings from the Survey on Migrant Integration (SIM2020). This survey was carried out among individuals with a Turkish, Moroccan, Surinamese, Caribbean-Dutch, Somali, Iranian and Polish background in 2020. A comparison group of individuals without a migration background was surveyed too. Individuals with a migration background are defined as first and second-generation migrants. The report contains figures on perceived discrimination (answer to the question about whether respondents have experienced discrimination) by origin or migrant group, gender and generation. The survey was carried out in the period march 2020 - January 2021 via a online structured questionnaire.	This survey was carried out among individuals with a Turkish (n = 696), Moroccan (n = 570), Surinamese (n = 638), Caribbean-Dutch (n = 592), Somali (n = 519), Iranian (n = 855) and Polish (n = 682) background in 2020. A comparison group of individuals without a migration background (n = 771) was surveyed too. The sample was Statistics Netherlands (CBS), which drew the sample.Statistics Netherlands (CBS) has acces to population register data.	Not applicable - national level
