DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

Research findings

Country code	Year	Reference details title	Reference details URL	Main thematic focus	Institution	Key findings - Short summary	Methodology (Qualitative/Quantitative and exact type used, questionnaires etc)	Sample details and representativeness	Area/location of interest - NUTS3 level
Czechia	2023	Institute of Sociology of the Czech Academy of Sciences, Public Opinion Research Centre (2023) "Tolerance Towards Selected Population Groups – February/March 2023" (Tolerance k vybraným skupinám obyvatel – únor/březen 2023), 27 April 2023.	https://cvvm.soc.cas.cz/cz/tiskove-zpravy/ostatni/vztahy-a-zivotni-postoje/5661...	Public perceptions and attitudes	Czechia, Institute of Sociology of the Czech Academy of Sciences	In February/March 2023, CVVM surveyed Czech attitudes toward various groups. The most rejected were persons with drug addiction (90%), persons with alcohol addiction (69%), and ex-convicts (64%), while the most accepted were people considered to be poor (2%) and the wealthy (5%). About 14% opposed foreigners and people of different skin colours, with similar attitudes toward Muslims. Rejection of LGBTQI individuals dropped from 42% in 2003 to 11% in 2023. Tolerance varies by education, age, and living standards; younger people are more accepting of people with drug and alcohol addictions. Younger people have significant more positive attitudes toward Muslims, as 60% of those aged 60+ reject Muslims, while among young people it is 30%.	Quantitative, Computer Assisted Personal Interviewing,	861 respondents (aged 15+), representative sample, using quota sampling based on demographic and regional criteria	Not applicable - national level
