# DATABASE 2012-2024 ON ANTI-MUSLIM HATRED

## Research findings

| Country code | Year | Reference details title | Reference details URL | Main thematic focus | Institution | Key findings - Short summary | Methodology (Qualitative/Quantitative and exact type used, questionnaires etc) | Sample details and representativeness | Area/location of interest - NUTS3 level |
|---|---|---|---|---|---|---|---|---|---|
| Germany | 2023 | Germany, Perry, S., Göcmen, I., Hanano, R and Ceyhan, G. (2023). Erfahrungen und Umgangsstrategien von Betroffenen von antimuslimischem Rassismus (Experiences and coping strategies of those affected by anti-Muslim racism), Berlin, CLAIM. | https://www.claim-allianz.de/aktuelles/news/studie/ | Racism & xenophobia | Germany, CLAIM | The study explores the experiences and coping strategies of persons affected by anti-Muslim hatred. It finds that 80% of the respondents from the quantitative online-survey experience anti-Muslim discrimination of harassment, whereas 57% of the respondents have never sought any support measures (counselling, reporting an incident, lodging a complaint or criminal procedures). However, the majority of respondents affected by anti-Muslim hatred are aware that they are discriminated against and/or harassed (16 out of 18 of the interviewees). Respondents who have never sought support mechanisms stated to prefer informational material online or by private contacts/family/friends. | Explorative, mixed-method study (n = 740 online surveys, n = 18 semi-structured interviews) | The sample consists of Muslims people (18 years and older) and people perceived as Muslims in Germany | Not applicable - national level |
