Finland	2024	Finnish Institute for Health and Welfare (Terveyden ja hyvinvoinnin laitos) (2024), Kansallinen tutkimus ulkomailla syntyneiden terveydestä, hyvinvoinnista ja palveluista (MoniSuomi) (National survey on health, well-being and service use among foreign-bo	https://thl.fi/en/research-and-development/research-and-projects/national-surve...	Discrimination	Finland, Finnish Institute for Health and Welfare, Terveyden ja hyvinvoinnin laitos	The study produces information on the health and well-being of the foreign-born adult population living in Finland, including their experiences of discrimination. It shows that 29% of immigrants had experienced discrimination on the basis of origin, ethnic background, or colour in the previous 12 months. Of these, 33% were persons who had moved to Finland from the Middle East and North Africa. In this group, 38% were men and 29% women. 5% of immigrants experienced discrimination on the basis of religion in the previous 12 months. The largest group (14%) was persons from the Middle East and North Africa, the rate was 17% for women and 12% for men.	The survey was conducted as a sample study. The sample of participants was obtained from the Digital and Population Data Services Agency. The data collection begun in September 2022 and ended in March 2023. The data were mainly collected through an online questionnaire. The data collection was supplemented with paper questionnaires and phone interviews as well as register data. The material for the survey was translated from Finnish into 19 different languages. The majority (76 %) of the persons retrieved to the survey received the material in their mother tongue, in addition to Finnish or Swedish.	The sample of participants was obtained from the Digital and Population Data Services Agency. The sample consisted of 18,600 people either born abroad or with parents born abroad. The participants are aged between 20 and 74 years. The sample submitted 7,838 responses. The response rate was 44 %.	Not applicable - national level
