DISCLAIMER: This document was commissioned under a specific contract as background material for the project on [National intelligence authorities and surveillance in the EU: Fundamental rights safeguards and remedies](#). The information and views contained in the document do not necessarily reflect the views or the official position of the EU Agency for Fundamental Rights. The document is made publicly available for transparency and information purposes only and does not constitute legal advice or legal opinion. FRA would like to express its appreciation for the comments on the draft report provided by Belgium that were channelled through the FRA National Liaison Officer.

# Summary

## 1. Description of the legal framework

In Belgium the intelligence and surveillance activities are regulated at the Federal level.

As regards the legal framework, surveillance activities are mainly governed by the law of 30 November 1998 on intelligence and security services and by the Law of 8 December 1992 on the protection of privacy in relation to the processing of personal data. The Act of 4 February 2010 on data collection methods by the intelligence and security services<sup>1</sup> (introducing amendments to the aforementioned law of 30th November 1998) came into force on 1 September 2010, providing more far reaching powers for intelligence and security services, including the possibility to tap phones, to enter homes of people suspected of being involved in terrorist activities without their consent.

The law of 18 July 1991 governing the review of the police and intelligence services and of the coordination unit for threat assessment<sup>2</sup> subjects the intelligence services to a review by the Standing Committee I<sup>3</sup>.

The Electronic Communications Act 2005<sup>4</sup> sets out principles relating to confidentiality of communications, processing data and protection of private life of users. The law mandates that telecommunications network operators and service providers store traffic and identification data of their end users for various law enforcement purposes for 12 months, including allowing intelligence services to access and gather that type of data in order to carry out their mission.

a. types of security services and bodies involved (and b. extent of their powers)

The Belgian intelligence and security community consists of the following **services and bodies**:

### **Bodies mainly undertaking surveillance:**

- Intelligence and security services: there are two intelligence and security services in Belgium:
  - The **State Security** (Veiligheid van de Staat/Sûreté de l'Etat) is the civil intelligence service. The service is primarily under the authority of the Ministry of Justice and sometimes falls under the authority of the Minister

<sup>4</sup> Belgium, law of 13 June 2005 (Loi du 13 Juin 2005 relative aux communications électroniques/Wet betreffende de elektronische communicatie) published on 20-06-2005, no. 2005011238, [http://www.ejustice.just.fgov.be/cgi\\_loi/change\\_lg.pl?language=fr&la=F&table\\_name=loi&cn=2005061332](http://www.ejustice.just.fgov.be/cgi_loi/change_lg.pl?language=fr&la=F&table_name=loi&cn=2005061332).

of the Interior. The main mission of the service is to collect and analyse information that reveals a threat to Belgium and to inform the government. It is also responsible for protecting foreign VIPs, and vetting procedures with regard to classification and security clearances. It can also provide assistance and technical support in judicial investigations<sup>5</sup>.

- The **General Intelligence and Security Service of the armed forces** (Algemene Dienst Inlichting en veiligheid/Service Général du Renseignement et de la Sécurité - GISS) is the military intelligence service and is under the authority of the Minister of Defence. It is part of the armed forces. Its main role is collecting and analysing intelligence relating to any activity that threatens or could threaten the national territory, military defence plans, the armed forces or Belgian nationals abroad. The service also ensures the military security of the personnel of the Defence. It is also mandated with neutralising cyber-attacks on Defence networks and identifying perpetrators. Similarly to the State Security this service carries out vetting procedures for individuals who have access to secret information in their work. It can also lend assistance and technical support to the judicial authorities.<sup>6</sup>
- The **Coordination Unit for Threat Assessment (CUTA)** has been operational since 1 December 2006 and is under the joint authority of the Ministers of the Interior and Justice. It draws up specific or strategic evaluations of terrorist and extremist threats in and to Belgium, relying on intelligence obtained by different services (including the State Security; the GISS; the Department of Customs and Excise of the Federal Public Service of Finance; the Department of Federal Immigration of the Federal Public Service of the Interior; the Federal Public service of mobility and transport; the Federal Public Service of Foreign Affairs, Foreign Trade and Development Co-operation). The threat assessments are made for the political, administrative and judicial authorities<sup>7</sup>.

c. control/oversight mechanisms,

Two entities are in charge of reviewing special intelligence gathering methods: the administrative Commission and the Standing Committee I. This is regulated by the Law of 18 July 1991 and the Law of 30 November 1998 mentioned above.

- **Standing Intelligence Agencies Review Committee (Standing Committee I)** is a permanent and independent parliamentary review body set up by the Act of 18 July 1991. It is responsible for reviewing the activities of the State Security, the General Intelligence and Security Service of the Armed Forces. The review usually relates to the legitimacy (review of observance of the applicable laws and regulations), effectiveness (supervision of the efficiency of the intelligence services), and coordination (the

<sup>6</sup> Belgium, more information on the GISS website: [www.mil.be/is](http://www.mil.be/is).

<sup>7</sup> Belgium, as set out in the Threat Assessment Act of 10 July 2006 (Loi du 10 Juillet 2006 relative à l'analyse de la menace ; 10 Juli 2006 Wet Betrefende de Analyse Van de Dreiging), M.B. 20 July 2006 <http://www.comiteri.be/images/pdf/wetgeving/wet%20van%2010%20juli%202006.pdf?phpMyAdmin=97d9ae9d92818b6f252c014a4a05bdfb/>.

mutual harmonization of the work of the services concerned). The Committee also reviews the Coordination Unit for Threat Assessment with regard to their obligation to pass on information on terrorism and extremism. The Committee oversees the policies of the intelligence and security services; completed and ongoing operations; administration and management; budgets and expenditure of the agencies. It also investigates complaints from the public and advises on draft legislation or statutory amendments. More specifically, the oversight body has the following powers:

- It performs its reviewing role through investigations that it starts on its own initiative, on the request of the Chamber of Representatives or the competent minister or authority, or on the request of a citizen or a civil servant who lodges a complaint or files a denunciation.
  - It is also responsible for a posteriori controlling of the specific and exceptional intelligence data collection methods used by the intelligence and security services. Here the Committee acts as a judicial body.
  - Provides written advice to the judicial authorities on the legality of the way in which information added to criminal proceedings was collected by the intelligence and security services.
  - On request the Committee can advise on a Bill, draft Royal Decree, Circular Letters or any other document expressing the political orientations of the competent ministers regarding the functioning of the intelligence services or the Coordination Unit for Threat Assessment.
  - Responsible for controlling interceptions of communications from abroad, which the military intelligence service can, for military purposes, intercept, tap and record.
  - It can request to carry out an investigation in the framework of a parliamentary enquiry. Ensures the chairmanship and the registry of the Appeal body for security clearances, certificates, and advice.
  - Judicial role: when instructed by the judicial authorities, its investigations service investigates the members of the reviewed services who are suspected of having committed a felony or misdemeanor.
- 
- The **Administrative Commission** responsible for monitoring specific and exceptional intelligence data collection methods used by the intelligence and security services is the entity responsible for reviewing special intelligence gathering methods. It is made up of three acting members and three substitute members. One of the members has the capacity of State prosecutor, and the two others have the capacity of judge.
  - **Standing Police Services Review Committee** –This Committee was created in 1991 as an oversight committee on the police. It has a monitoring role on the functioning of the police, including by channeling complaints from citizens<sup>8</sup>.
  - **Ministerial Committee for Intelligence and Security** (Ministerieel Comité voor inlichtingen en veiligheid/Comité ministériel du renseignement et de la sécurité) – This Committee is the political body determining the general intelligence policy of the government. It takes political and legislative initiatives with regard to intelligence and security, and instructs both intelligence services. The Committee is currently made up of the Prime Minister, the Minister of Foreign Affairs, the Minister of Justice, the Deputy Prime Minister and Minister of Economy, the Minister of Defence, the Minister

---

<sup>8</sup> Belgium, <http://www.comitep.be/fr/index.asp>.

of the Interior.<sup>9</sup> **Board of Intelligence and Security** (College voor inlichtingen en veiligheid/Collège du renseignement et de la sécurité) – This body executes the decisions made by the Ministerial Committee for Intelligence and Security.<sup>10</sup>

d. geographical scope of surveillance

The **geographical scope** of the State security department is limited to the Belgian national territory. The mandate of the Military security service is also to protect the operations of the Belgian Armed Forces and Belgian citizens abroad. This does not suggest extra-territorial power to Belgium to conduct surveillance in other EU MS however.

e. conditions under which intelligence services can conduct surveillance and for which purpose(s) (such as national security, investigation or prevention of crimes, etc.)

As mentioned above the national intelligence services can collect information that can be a threat or potential threat to Belgium and additionally for the GISS, military defence plans, the armed forces or Belgian nationals abroad. Specific threats to national security defined in law are any activity, individual or collective, carried out in Belgium or abroad, which can be linked to espionage, terrorism, extremism, proliferation, harmful sectarian organisations, criminal organisations, and attempts to influence decision-making through misleading and illegal means. This includes disseminating propaganda as well as financial, technical and logistical support (Article 8, Law on intelligence and security 1998)<sup>11</sup>.

To this end, intelligence and security services may resort to the following data collection methods (as set out in the law of 30th November 1998 on intelligence and security services):

**Ordinary methods** includes the use of open source; the use of informants (human sources; and observation of public places and private places accessible to the public without the use of technical means.

**Specific methods** include observation using technical means, in public places and private places accessible to the public or observation, with or without the use of technical means, of private places which are not accessible to the public; inspection, using technical means, of public places, private places accessible to the public and closed objects located in these places; consulting data identifying the sender or addressee of a letter or the owner of a PO box; measures used to identify the subscriber or habitual user of an electronic communication service or the means of electronic communication used; and measures used to find call information for electronic communication methods and localisation of the origin or destination of electronic communications.

<sup>10</sup> Belgium, see Belgian Standing Intelligence Agencies Review Committee website:

[http://www.comiteri.be/index.php?option=com\\_content&task=view&id=53&Itemid=53&phpMyAdmin=97d9ae9d92818b6f252c014a4a05bdfb%3F%3DEN&lang=EN](http://www.comiteri.be/index.php?option=com_content&task=view&id=53&Itemid=53&phpMyAdmin=97d9ae9d92818b6f252c014a4a05bdfb%3F%3DEN&lang=EN).

<sup>11</sup> Belgium, Law on Intelligence and Security (Wet houdende regeling van de inlichtingen- en veiligheidsdienst, B.S., 18 december 1998, Loi organique des services de renseignement et de sécurité, M.B. 18 December 1998, [http://www.ejustice.just.fgov.be/cgi\\_loi/change\\_lg.pl?language=fr&la=F&table\\_name=loi&cn=1998113032](http://www.ejustice.just.fgov.be/cgi_loi/change_lg.pl?language=fr&la=F&table_name=loi&cn=1998113032).

**Exceptional methods** include observation, with or without the use of technical means, among others in private places which are not accessible to the public, or in premises used for professional purposes or as a residence for a lawyer, doctor or journalist; inspection, with or without the use of technical means, among others of private places which are not accessible to the public or premises used for professional purposes or as a residence for a lawyer, doctor or journalist and of closed objects found in these places; setting up or appealing to a legal entity to support operational activities and appealing to officers of the service, under a false identity or in a false capacity; opening and reading letters, either sent via a postal service or not; collecting data on bank accounts and bank transactions; intrusion into a computer system, with or without the use of technical means, false signals, false codes or false capacities; tapping, listening to and recording communication.

For exceptional methods, the Administrative Commission also carries out an a priori review: it must provide assent prior to the use of such a method. Only for the cases where there is a judicial investigation in the same time than an intelligence investigation, the Commission decides, with the Federal court or competent magistrate, whether the service of information and security may continue its investigations.

- f. different stages of surveillance procedure (collection, analysis, storing, destruction)

As regards storing and destruction, the Administrative Commission can visit the place where the intelligence is stored, it can seize and hold the intelligence under its surveillance and hear the involved members of the intelligence and security services.<sup>12</sup>

## 2. Safeguards foreseen by the legal framework

The Standing Intelligence Agencies Review Committee can act: 'ex officio', through a parliamentary or ministerial action or decision. It has its own investigations office acting through complaints (including from individuals), a public prosecutor or a decision by an investigating judge (procedure described above in the section on oversight bodies).

### **Specific safeguards:**

The Law of 8th December 1992 on privacy and data protection sets out safeguards on right to information (Article 9); challenging the processing of data (Article 10). However these do not apply to the processing of personal data by the State Security, the General Intelligence and Security Service of the Armed Forces (Article 3 § 4)

*Addressing the Commission for the Protection of Privacy:* The law nonetheless sets out in Article 13 that anyone proving his identity has the right to address the Commission for the Protection of Privacy free of charge,

Administrative Commission: reviewing specific and exceptional data collection methods used by the intelligence services.

## 3. Judicial or non-judicial remedies

---

<sup>12</sup> Article 18/3§2 and 18/10§6 Belgium, Law on Intelligence and Security (Wet houdende regeling van de inlichtingen- en veiligheidsdienst, B.S., 18 december 1998, Loi organique des services de renseignement et de sécurité, M.B. 18 December 1998, [http://www.ejustice.just.fgov.be/cgi\\_loi/change\\_lg.pl?language=fr&la=F&table\\_name=loi&cn=1998113032](http://www.ejustice.just.fgov.be/cgi_loi/change_lg.pl?language=fr&la=F&table_name=loi&cn=1998113032).

Any citizen who considers that his/her individual rights have not been respected by the State Security, the General Intelligence and Security Service, the Coordination Unit for Threat Assessment or by a supporting service acting in this capacity, may lodge a complaint. The law also enables citizens to inform the Standing Committee I of their complaints or denunciations in the event of any dysfunction noted within the services mentioned above.<sup>13</sup>

Complaint with the **Standing Intelligence Agencies Review Committee**: the Committee can examine, upon complaint by a citizen with a legitimate interest, the legality and effectiveness of activities and decisions of the intelligence services, and of the specific and exceptional methods used for collecting data. Anybody who is or has been directly affected by the action of an intelligence service, the Coordination Unit for Threat Assessment or a support service can lodge a complaint or file a denunciation to the Standing Committee I or its Investigations Service.

Moreover, any civil servant or any person who holds a public office and any member of the armed forces who is directly affected by the directives, decisions or rules of application thereof, as well as by procedures or actions, can lodge a complaint or file a denunciation without having his/her supervisor or hierarchical superiors' permission. Verbal complaints can be lodged in the offices of the Standing Committee I and written complaints can be lodged by e-mail, fax or letter. The Committee also acts as a judicial body. If the Standing Committee I notes that the decisions regarding special methods are illegal, it orders the cessation of the method concerned and prohibits the use of the data collected using this method and orders their destruction.

**The administrative Commission responsible for monitoring specific and exceptional intelligence collection methods used by the intelligence and security services**: In the context of specific and exceptional intelligence data collection methods used by the intelligence and security services, the administrative Commission reviews the legality of the measures, including ensuring that the principles of subsidiarity and proportionality have been respected. In some cases, the methods can only be used after the administrative Commission has given its assent to the head of the intelligence service's decision to use a specific or exceptional method. If the strict rules have not been followed, the administrative Commission may order a provisional ban on the use of the data collected via the method as well as the suspension of this method.

- Other remedies:

Complaint with the **Commission for the Protection of Privacy**: If a citizen has been unable to apply the Open Government Act<sup>14</sup> to consult the information that an intelligence service (or the Coordination Unit for Threat Assessment) has collected on him/her, he/she can turn to the Commission for the Protection of Privacy. However, the citizen is not allowed to consult such information. The Commission can make recommendations. Moreover, it can decide to rectify or remove data, or have data introduced that differ from those processed; it may also prohibit the disclosure of data. Further, after the Commission's verifications, the service concerned shall inform the Commission of the effect that has been given to the recommendations

---

<sup>13</sup> Belgium, see Belgian Standing Intelligence Agencies Review Committee website:

[http://www.comiteri.be/index.php?option=com\\_content&view=article&id=4&Itemid=8&lang=EN](http://www.comiteri.be/index.php?option=com_content&view=article&id=4&Itemid=8&lang=EN).

<sup>14</sup> Belgium, Open Government Act (Loi n° 94-1724 du 11 avril 1994 relative à la publicité de l'administration/ Wet betreffende de openbaarheid van bestuur), 13 June 1994, no. 1994000357 ,[http://www.ejustice.just.fgov.be/cgi\\_loi/change\\_lg.pl?language=nl&la=N&cn=1994041151&table\\_name=wet](http://www.ejustice.just.fgov.be/cgi_loi/change_lg.pl?language=nl&la=N&cn=1994041151&table_name=wet).

(Articles 43 and 44 of the RD of 13/02/2001). In addition, the Commission has the power to bring infringements of the laws to the attention of the judicial authorities.

Complaint with the **Federal Ombudsman**: This body supervises any 'federal administrative service' and thus also the services that the Committee reviews. The federal ombudsman can start an investigation after a complaint from a citizen or on the request of the Chamber of Representatives. Unlike the Standing Committee I, it does not have a right of initiative.

Complaint with the **general judiciary** (ordinary courts): If a basic right is violated or if a person has suffered damage due to unlawful or careless acts of government, the person concerned can go through the ordinary courts in order to stop an ongoing illegality and to award compensation.

Complaint with the **Council of State**: the Council of State can annul decisions by administrative authorities, if a person claims that a decision was made on the basis of an advice by the intelligence services about his situation which contained incorrect elements. In addition, the Council of State can quash the refusal of an intelligence service to allow a person to consult administrative documents that relate to him (on the basis of the Law of 11 April 1994 on the Open Government).

## Annex 1 – Legal Framework relating to surveillance

### A- Details on legal basis providing for surveillance

Name and type of the surveillance-related law	A definition of the categories of individuals liable to be subjected to such surveillance	Nature of circumstances which may give rise to surveillance	List purposes for which surveillance can be carried out	Previous approval / need for a warrant	List key steps to be followed in the course of surveillance	Time limits, geographical scope and other limits of surveillance as provided for by the law	Is the law allowing for surveillance in another country (EU MS or third countries)?
<p>Law 30th November 1998 on intelligence and security services/Wet houdende regeling van de inlichting-en veiligheidsdienst/ Loi organique des services de renseignement et de sécurité (Ref. ## Annex 4 – Surveillance-related case law at national level

Please provide a maximum of three of the most important national cases relating to surveillance. Use the table template below and put each case in a separate table.

<b>Case title</b>	Belgium Constitutional Court, case No. 145/2011, 22 September 2011 at paras 88 and 92
<b>Decision date</b>	September 2011
<b>Reference details (type and title of court/body; in original language and English [official translation, if available])</b>	Belgium Constitutional Court, case No. 145/2011, 22 September 2011
<b>Key facts of the case (max. 500 chars)</b>	The Act of 4 February 2010 on data collection methods by the intelligence and security services was passed and came into force on 1 September 2010. It inserted provisions in the 1998 Act providing new far reaching powers for the secret services (intelligence methods). These include the possibility to tap phones, to enter homes of people suspected of being involved in terrorist activities without their consent. The Flemish, francophone and germanic bar councils requested, jointly with the Ligue des Droits de l’Homme that the Act should be declared unconstitutional.
<b>Main reasoning/argumentation (max. 500 chars)</b>	Not having an active notification of the person subject to a secret intelligence method was deemed very serious as every possibility of effective supervision and legality control would be excluded. The reasoning used was the same as the reasoning of the ECtHR in the Klass case.
<b>Key issues (concepts, interpretations) clarified by the case (max. 500 chars)</b>	The Belgian Constitutional Court declared the Act partly incompatible with the Constitution. Article 2 para. 3 of the 1998 Act as rewritten by the 2010 reform (providing that a person subject to a secret intelligence methods is only informed afterwards on request) was declared unconstitutional and contrary to the ECHR.
<b>Results (sanctions) and key consequences or implications of the case (max. 500 chars)</b>	The Belgian Constitutional Court ruled for a partial annulment of the reform Act of February 2010.

## Annex 5 – Key stakeholders at national level

Please list all the key stakeholders in your country working in the area of surveillance and divide them according to their type (i.e. public authorities, civil society organisations, academia, government, courts, parliament, other). Please provide name, website and contact details.
