The pledge to leave no one behind lies at the very heart of the 2030 Agenda for sustainable development. How can we ensure we deliver on it?

This side event will look at ways of identifying and reaching those at risk of being left behind. It will highlight the importance of relevant, high-quality data and present tools, approaches and good practices that can support the development of inclusive policies and programmes.

Discussions will focus on equality and non-discrimination as the cross-cutting principles of the 2030 Agenda, with a particular focus on the SDGs under review in 2019.
